

## QUALITY AND ENVIRONMENTAL MANAGEMENT POLICY

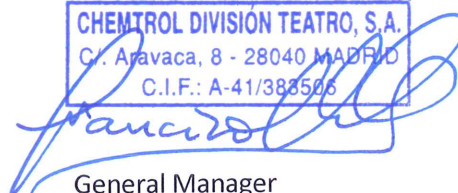

CHEMTROL DIVISION TEATRO, S.A. is a worldwide leader in the execution of stage equipment projects. The company is specialized in the **engineering and installation of stage equipment systems**, such as steel works, stage machinery, production lighting, sound, communications, conference, audiovisuals, projection, finishing and electricity for theatres, auditoriums, congress centers, conference rooms, multipurpose rooms, theme parks, universities, etc.

For all type of projects, CHEMTROL, based on the continuous improvement of its experience, technological capability and innovation commitment, offers to its clients global solutions tailored to their needs and resources, enabling a total integration of equipment and systems.

From these basic pillars, our company's Policy defines all principles of our actions, which we intend inspire all activities and services provided by our organization and help to make public our compromises:

- To comply with the agreed requirements and continuously improve the efficiency of our management system.
- To collaborate honestly with our suppliers/subcontractors, to whom we want to inform that we evaluate them based on the number of Non-Conformity issues we may detect.
- To work for the protection of our environment, including contamination prevention.
- To promote human relations with our employees, assuring the professional capacity, competence and attitude of our workers through training and environmental consciousness programs.
- To work for the continuous improvement of our operations and the management of our Integrated System (Quality and environmental), refining also the relationship with all parties involved, taking into consideration their satisfaction level and establishing communication channels with the rest for a mutual benefit.
